Fisiocritici Natural History Museum

Accademia dei Fisiocritici

A change from religious art: natural history in a historic scientific institution.

Check the museum’s own opening calendar, admission details and any workshops. Do not assume the hours match the major tourist monuments.

Why stop here

The Fisiocritici museum offers a different Siena, centred on natural specimens and scientific curiosity. It is a useful option for a second visit, a family interested in nature, or a day that needs a change from churches and paintings.

A useful visit

Choose a focused visit, then continue to Orti de’ Tolomei. With children, follow their interests instead of trying to inspect every display.

What to consider

Confirm access to the areas you want to see. Special activities can require separate booking, and closures around local events can affect the visit.

Where to go next

Orti de’ Tolomei | Siena Cathedral complex | ChigianArtCafé
